

IEC Chesapeake Apprenticeship & Training presents:

Commissioning, Maintenance & Troubleshooting Systems

IEC Chesapeake Odenton Training Facility

1424 Odenton Road, Classroom F, Odenton, MD 21113

Course Summary – This seminar is designed for existing PV installation contractors, though it will also provide value to those broadly involved in the PV industry and those looking to become an installing contractor.

As the solar industry grows, there will be an increasing demand for service work. This opens up opportunities for solar contractors to increase their customer base and revenues. This seminar will give you the knowledge of how to properly commissioning both grid-interactive and stand-alone PV systems and it will teach you how to maintain and troubleshoot both these types of systems. This seminar is packed with useful information, tips and techniques based on years of experience.

This seminar will help prepare for the NABCEP Installer Exam.

Course will cover:

- Steps to commission any PV system
- The most common design and installation errors and how to avoid them
- How to troubleshoot systems over the phone
- The most common mechanical failures and how to correct them
- The most common electrical failures and performance problems and how to correct them
- Tips for increasing profits and winning new customers

The instructor, Jeff Gilbert is President of Azimuth Solar Training LLC, a leading mid-Atlantic renewable energy training provider and program developer. He brings over 17 years of experience in the renewable energy industry and is one of the few people in the country to be NABCEP certified for both PV and Solar Hot Water systems.
